

Stormwater Management Case Study

StormTech System
SERENA Development Dubai, UAE

Client:	Dubai Properties
Consultant	Parsons
Contractor	Wade Adams Contracting
Application	Soakaway / Infiltration
Quantity	4500m ³

Serena, by Dubai Properties is a master-community that will cover an area of 8.2 million square feet. The developer plans to build this community around affordable housing communities and the project will be built in three phases.

StormTech was used to care of the storm water landing on the residential areas to manage this water effectively as nature intended through the use of a soakaway.
