

## Stormwater Management Case Study

### SPEL Oil Interceptors AKOYA by DAMAC Dubailand Dubai, UAE

<b>Client</b>	DAMAC
<b>Consultant</b>	KEO International
<b>Contractor</b>	WEPCO / Ghantoot Group
<b>Product</b>	Purceptor Class 1 Full Retention Oil Separators

Akoya is a master-community along Al Qudra Road. It consists of various types of townhouses, villas, branded villa residences and condominiums built around parks and a Trump branded golf-course. Along with a residential component, Akoya also includes retail, hospitality and other amenities.

Supplied Oil Interceptors (manufactured by SPEL) on year 2015 to provide a reliable and efficient way to protect the environment from leaks and spillages of oil and fuel, washed down drains every time it rains.
